“Innovation and Information Impact in the Caribbean: Evidence-Based Practice of the Library and Information Professional” is the Conference theme. It proposes an approach which aims to transform the professional management of information in intelligent organizations, using the best available evidence, together with a pragmatic perspective developed through the library work. As designed by the President, the conference will present prominent speakers and colleagues specialized in the field; and as expected, the conference will include lectures, seminars, workshops, special interest group meetings by information units, and meetings by subject area groups; poster presentations, technology updates and visits to libraries and other information units.
